---

Good afternoon,

The next generation vessel has departed SIL and is en route to the lower river transect (RM 11.8). The crew has a 30 gallon primary tank and a 2200 psi (140 cf) back up air tank 21% O2 (photo 1 and 2). The (viking) suites are slick (photo 3) and have mated neck dams, as well as integrated glove to sleeve latex connection for full coverage. The crew plans to have live video for diving activities.
